**GENERAL RULES OF ADVANCE DIRECTIVES AND SURROGATE DECISION MAKING**

1) Adult (18+) Principal/Declarant (person executing the advance directive for him or herself) is considered competent (having decisional capacity) unless judged by physician or Court otherwise.

2) Capacity is a legal determination made by a Judge or a clinical determination made by a doctor. Both refer to the ability of a person to understand information, weigh risks and benefits, consider consequences, make and communicate decisions. The term competence is often used interchangeably with capacity.

3) Capacity is decision-specific; the same individual may have capacity (be competent) to make certain decisions and not others.

4) Principals and Wards (persons subject to Guardianship—see below) must always be consulted on health care decisions and appointment of surrogates; objections must be taken into careful consideration and honored if deemed competent.

5) Surrogate decision makers (authorized persons making decisions on behalf of a Principal or Ward) must always act first in accordance with known wishes of Principal/Ward and second according to Principal/Ward’s best interests—not on wishes of surrogate decision maker.

<tr>
<td>CRS 15-18.101–113; “Colorado Medical Treatment Decision Act” INCLUDES UPDATES PER HB-10-1025 TO TAKE EFFECT 8/11/2010</td>
<td>Directs that life-sustaining treatment be withdrawn or withheld when Declarant (person executing the form) (a) has an incurable or irreversible condition which 2 doctors consider to be terminal, or (b) in persistent vegetative state, and (c) lacking decisional capacity.</td>
<td>Allows Declarant to direct continuation or termination of artificial nutrition or hydration. May include other preferences and instructions for care following certification of terminal illness or PVS. May be combined with a document appointing health care power of attorney. May grant to health care POA authority to override. May designate persons with whom providers may discuss Declarant’s condition.</td>
<td>Replace or obviate need for additional instructions to/in MDPOA—additional directives included in Living Will only apply when patient has been certified terminal or in PVS. Directives or preferences for care prior to terminal phase must be documented elsewhere.</td>
<td>Declarat, at least 18 and having decisional capacity, and 2 witnesses who are NOT any of the following: any doctor or employee of Decrante’s doctor, any employee of the facility or agency providing Decrante’s care, any creditors or heirs. Notary seal and signature optional.</td>
<td>Only under the conditions stated in column 1</td>
<td>At death of or revocation by Declarant, or, if authorized to revoke, by the Declarant’s health care POA.</td>
<td>The Declarant. Agents under Medical Durable Power of Attorney (MDPOA) may ONLY override or revoke a Living Will if express authority to do so is granted in the Living Will or MDPOA. Proxies by Statute, DBs (see p. 6), and Guardians may NOT override a Living Will. A spouse, parent, or adult child; Agent, DB, Proxy, or Guardian may challenge the Living Will’s validity in Court within 48 hours after doctors have signed certification of terminal illness or PVS.</td>
</tr>
</tbody>
</table>

**Penalties:** The Living Will is the only one of the various instruments that includes penalties: the statute includes misdemeanor-level penalties for any person who willfully conceals, defaces, damages, or destroys a declaration of another, without the knowledge and consent of the declarant, or any person who willfully withholds information concerning the revocation of the declaration of another; and felony-level penalties for any person who falsifies or forges a declaration of another or any person who falsifies or forges a declaration of another, and the terms of the declaration are carried out, resulting in the death of the purported declarant. As well, refusal of an attending physician to comply with a declaration and failure to transfer the care of the declarant to another physician constitutes unprofessional conduct.
| **Medical Durable Power of Attorney**  
CRS 15-14-503-509  
"Colorado Patient Autonomy Act" | **What It Does** | **What Else It Does** | **What It Doesn't Do** | **Who Can/Must Sign** | **When It Takes Effect** | **When It Expires** | **Who Can Revoke/Override** |
|---|---|---|---|---|---|---|---|
| Appoints person(s) (Agent) to make health care decisions for Principal either (a) right away or (b) when Principal lacks capacity to make decisions or speak for him/herself.  
Agent is a fully empowered surrogate for Principal—able to consult with physicians, view medical records, make all decisions related to health care of Principal.  
Agent is bound to make decisions according to wishes of the Principal, if known, or in Principal’s best interests. | Principal may include in MDPOA specific instructions to Agent concerning particular treatment choices or preferences.  
**NOTE:** “Interstate” provisions encourage but do not mandate recognition of and reliance on Colorado MDPOA in other states; also state that MDPOAs executed in other states may "be presumed to comply" with the Colorado statute and "may, in good faith, be relied upon" by health care providers in Colorado. | Does not vacate the rights of the Principal to express preferences, make decisions when able, or "fire" the Agent.  
Does not authorize Agent to make any decisions other than those directly related to health care.  
Does not grant authority to Agent to override valid Living Will executed by Principal unless specifically granted in the Living Will.  
Does not grant authority to Agent to override CPR directive executed by Principal. | Principal only must sign.  
Principal must be 18 and have decisional capacity.  
Agent must be 18,* have decisional capacity, and be willing to serve. If Agent is spouse and couple later divorces, legally separates, or annuls marriage, Agent is automatically removed unless otherwise expressly stated in document.  
Two witnesses and/or notary seal are optional but recommended to assist in interstate validity. | Can take effect immediately on signing or only when Principal is not able to make his/her own decisions (temporarily or long term). | At death of or revocation by Principal, or, if in effect only when Principal incapacitated, when Principal regains capacity. | The Principal, if competent.  
NO ONE BUT THE PRINCIPAL may override the decisions of a duly appointed Agent without a Court judgment.  
Others may challenge capacity of Principal or performance/appropriateness of Agent in Court.  
Agent under MDPOA "trumps" DB (see p. 6). |

*NEW:* There is some disagreement about whether Agent must be 18 or 21.  
Advance Directives Coalition "Yellow booklet" says 18; agency statutes say 21. Probably best to select agent 21 or older.

<tr>
<th>CPR Directive CRS 15-18.6-101–108</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>UPDATE:</strong> Revised regulations governing the CPR directive were passed by the Board of Health 3/17/10, and became effective 4/30/10. See NOTE below. For new regulations, see <a href="http://www.cdphe.state.co.us/regulations/ems/101502AMDCPR.pdf">http://www.cdphe.state.co.us/regulations/ems/101502AMDCPR.pdf</a>.</td>
</tr>
</tbody>
</table>

### What It Does

Instructs emergency medical service personnel, health care providers, and health care facilities as to the administration of cardiopulmonary resuscitation in the event the person’s (Declarant’s) heart or breathing malfunction or stop. Typically this instruction is a refusal of CPR; in the absence of a CPR directive, consent is presumed.

### What Else It Does

Holds health care professionals harmless from prosecution or civil suits in event of Declarant’s death when CPR withheld.

### What It Doesn’t Do

Does not have any effect on the administration of any other health care interventions in any other circumstances.

### Who Can/Must Sign

See important NOTE below.

Declarant (at least 18 and having decisional capacity), Agent under MDPOA, DB (see p. 6), Proxy by Statute, or Guardian, and, as a matter of best practice and if Colorado Board of Health form used, attending physician.*

Parents may sign a CPR directive for a minor child only AFTER attending physician has signed a “Do Not Resuscitate” (DNR) order.

*NEW* Whereas APNs and PAs may sign many other documents “requiring” a physician’s signature, a legal opinion obtained by CDPHE indicates that this does not apply to the CPR directive form issued by the Board of Health or in full compliance with its provisions.

### When It Takes Effect

On signature by Declarant (or Agent, Proxy, DB, or Guardian) and, as a matter of best practice and if Colorado Board of Health form used, attending physician.

### When It Expires

At death or revocation by the Declarant.

### Who Can Revoke / Override

The Declarant. The Agent, DB, Proxy by Statute, or Guardian may revoke/override a CPR directive ONLY IF the Agent, DB, Proxy, or Guardian executed the CPR directive on behalf of the Declarant.

NEW: If the Declarant or person authorized to make an anatomical gift for the Declarant wishes to donate Declarant’s organs or tissue, and if the Declarant has a CPR directive or any AD refusing life-sustaining treatment, the conflict must be resolved by the physician and Declarant or his/her authorized surrogate decision maker. If the conflict cannot be resolved ahead of time, CPR or other LSTs must be provided in order to preserve organs/tissues until conflict is resolved.

**NOTE:** The Colorado Board of Health has for many years printed and distributed special carbonless CPR directive forms on blue “security” paper. Some Emergency personnel and other advisors will claim that only this “blue form” is valid for refusal of CPR and that it must be the original (not a photocopy, etc.) and must have original signatures—NONE of which is required by statute. For instance, refusal of CPR may be included in instructions to a health care agent or in another advance directive, and many health care facilities have their own proprietary forms indicating refusal of CPR. Forms other than the BOH “blue form” may be signed by advanced practice nurses as well as physicians, or not signed by a health care provider at all. These matters have been clarified in revisions to the CPR directive regulations, passed by the Board of Health 3/17/10, effective 4/30/2010. However, until widespread education of EMTs accomplished, using the BOH “blue” form, with physician’s signature, is recommended because Emergency personnel are trained to recognize it without delay or undue scrutiny. Whatever form is used, it should clearly identify the individual to whom the directive applies and should, for practical but not legal reasons, be signed by both the Declarant and attending physician.

<td>Five Wishes</td>
<td>Privately produced by the Aging With Dignity nonprofit organization, the Five Wishes is an omnibus advance directive document which conforms to Colorado laws governing advance directives. It is thus &quot;legal&quot; in Colorado. It includes sections for appointment of a health care agent, refusal of various types of &quot;life support treatment&quot; including artificial nutrition/hydration under conditions such as terminal illness, permanent and severe brain damage, coma, etc.</td>
<td>Offers lots of choices and opportunities for direction around health and personal care such as desire for visitors &amp; entertainments, preferred place of death, comfort measures, etc. Offers many options by which the Principal might limit or expand the authority of his or her MDPOA agent. Offers opportunity for recording values, memories, spiritual and personal legacy. Funeral plans may also be recorded.</td>
<td>Does not provide authoritative instructions on administration of CPR. If one wishes to refuse CPR, such instructions may be written in, or—for quicker compliance by EMTs and first responders—a CPR directive or MOST (see below) must be completed.</td>
<td>Principal, at least 18 and having decisional capacity, and 2 witnesses who are NOT any of the following: • Health care Agent • DB (see p. 6)* • Principal's health care provider including the owner of health care facility in which Principal is living or being served • Any employee of Principal's health care provider • Relative by blood, marriage, or adoption • Creditor or heir</td>
<td>When Principal is determined, by attending physician and one other physician, to lack capacity to make or communicate decisions. <strong>NOTE:</strong> executing a Five Wishes revokes all previously executed health care advance directive.</td>
<td>At death or revocation by the Principal.</td>
</tr>
</tbody>
</table>

*This is an assumption based on close reading of the Designated Beneficiary Agreement Act, but not specified in the Five Wishes document itself.*

<tr>
<td>CRS 15-18.5-101–105  &quot;Proxy Decision-makers for Medical Treatment Act&quot;</td>
<td>When patient is, as determined by attending physician or APN, incapacitated and has no legally designated surrogate decision maker (i.e., Agent under MDPOA, DB [see p. 6]*, or Guardian), physician, APN, or physician’s designee, must make efforts to gather &quot;interested persons&quot; to appoint, by consensus, one of the group to be the Proxy decision maker (or &quot;Proxy by Statute&quot;). Interested persons include spouse, either parent, adult child, sibling, grandchild or any close friend of the patient. Selected Proxy should be one who knows the patient and his/her wishes best. Proxy selected by this process has full powers and responsibilities of medical decision making on behalf of the patient while he/she lacks decisional capacity except as noted in column 3.</td>
<td>Provides process by which, if the interested persons cannot reach a consensus as to the appointment of the Proxy or any of the parties disagrees with a decision of the Proxy, any party(ies) may petition the Court for Guardianship of the patient. Advises that the assistance of a health care facility’s ethics committee shall be provided on request of the Proxy or any of the other interested persons for decisions to withhold or withdraw medical treatment.</td>
<td>Does not grant authority to Proxy to withhold or withdraw artificial nutrition or hydration from patient unless 2 physicians (1 trained in neurology) certify that such provision will only prolong dying and will not contribute to patient’s recovery of neurological functioning.</td>
<td>Patient must be advised of both state of incapacity and identity of Proxy and has right to object. No signatures required, but documentation in patient’s medical record of the patient’s decisional incapacity and, if applicable, recovery of such capacity is required. If provision of artificial nutrition/hydration will only prolong dying, documentation of this fact in the medical record is also required.</td>
<td>When Court or physician or APN determines patient lacks capacity to make his/her own decisions</td>
<td>When Court or physician or APN determines patient has regained capacity, or at death of patient</td>
<td>Patient may object to Proxy designation or decisions and, if considered competent for that decision, patient’s wishes will be followed. Any interested party may challenge Proxy designation or decisions and initiate Guardianship process. Only when Proxy is removed by completed Guardianship process can his/her decisions be revoked or reversed.</td>
</tr>
</tbody>
</table>

*DB, or designated beneficiary, may be granted right to act as Proxy for corresponding DB. Although still unclear following 2010 revisions to the statute, it appears that said DB is to be automatically appointed Proxy without a consensus process.

**What It Does**

- Allows for two adult persons to designate each other as beneficiaries of a number of items and instruments related to health care, medical emergencies, incapacity, death, and administration of estates.
- All rights and duties enumerated in agreement are assumed to be granted unless specifically excluded. The model agreement requires that each right be specifically granted or excluded by each party—it is possible that Party A might grant/withhold different rights than Party B and vice versa.

**What Else It Does**

- DB at top of list in priority as Guardian
- Possible rights to be assigned to designated beneficiary (DB) include rights to:
  - Petition for and have priority (over Agent) for appointment as conservator, guardian, or personal rep for other DB;
  - Visit other DB in hospital, nursing home, hospice or similar healthcare facility;
  - Initiate formal complaint re care in nursing home;
  - Act as proxy decision maker for other DB pursuant to Proxy statute;
  - Receive notice of withdrawal/withholding of LST for other DB;
  - Challenge validity of Living Will of other DB;
  - Act as agent for granting of anatomical gifts;
  - Have standing to sue for wrongful death of DB;
  - Direct the disposition of DB's last remains

**What It Doesn't Do**

- Does not "do the job" or substitute for estate planning, advance medical directives, and other legal agreements. Only operative "in the absence of other estate planning documents" and is overridden by other instruments such as MDPOA, POA, Will, beneficiary designation on insurance policies or pension plans, regardless of when with respect to DB agreement those documents are executed.
- Does not clarify exact standing and powers of DB as "proxy" or "surrogate" decision maker.

**Who Can/Must Sign**

- Two competent adults (18 years+) who are not married to each other or anyone else nor party to any other DB agreement.
- Must be notarized.

**When It Takes Effect**

- When signed by both parties, notarized, AND received for recording by County Clerk and Recorder of the county in which one of the DBs resides.

**When It Expires**

- When superseded in whole by superseding legal document. Other legal documents may supersede parts of the DB agreement.
- On death of one or both parties to the agreement; however, certain rights granted to DB may survive the death of the other DB (e.g., right to dispose of remains, etc.)

**Who Can Revoke/Override**

- May be revoked by either party unilaterally but a formal revocation must be recorded with County Clerk and Recorder; also revoked on marriage of either party.
- If either party to DB has previously designated or in future designates an Agent for health care by MDPOA, Agent has authority.
### MOST: Medical Orders for Scope of Treatment

Passed by Colorado Delegate Assembly and signed by Governor in 2010 session.

**UPDATE:** Effective August 11, 2010.

For questions on form or program, contact the Colorado Advance Directives Consortium: see last page.

### A summary of advance directives / current instructions with respect to key areas of medical treatment:
- **CPR**
- **General scope of treatment** (comfort care only, limited interventions, full treatment)
- **Provision of artificial nutrition/hydration (ANH)**
- **Provision of antibiotics**

On signature of MD, DO, APN, or PA, the MOST becomes medical orders, rather than just patient preferences.

It is intended to stay with person/patient as he/she moves into and out of various health care facilities and settings (e.g., nursing home, hospital, hospice).

It is intended for the chronically or seriously ill person who is in frequent contact with health care providers or already residing in a nursing facility.

### Provides prompts for frequent review of orders and documentation of any changes as person’s condition or circumstances change.

- Allows receiving physician latitude to discuss orders with patient or authorized surrogate if the physician thinks that the orders are medically inappropriate. If changes are made based on such a discussion, they are to be documented on the form and the form resigned or revoked and replaced.

- Provides an “out” if an individual provider or facility cannot comply with the orders on the form due to religious or moral convictions: in such a case, the patient must be informed of such refusal to comply and be transferred to the care of another provider who will comply.

### Does not replace or remove the need to complete other advance directives.

- Does not appoint an Agent (simply names Agent in place, if any).

### Does not provide context or opportunity for detail or directives on treatment options not specifically named on or added to the form.

### Declarant, at least 18 and having decisional capacity, Agent under MDPOA, Proxy by Statute, or Guardian and MD, DO, APN, PA must sign.

### On signature by Declarant or Agent under MDPOA, DB (see p. 6), Proxy by Statute, or Guardian and MD, DO, APN, PA

### At death of Declarant, revocation, or replacement

### Declarant or Agent under MDPOA, DB, Proxy by Statute, or Guardian. However, provisions of a Living Will executed by the Declarant may not be overridden by any surrogate unless specifically authorized in the Living Will.

See column 3 for latitude granted to receiving physician to question/revise orders.
